AND HIGH SCHOOL**

## WHO WE ARE

Founded in 1990, Charles Bégué Education Network is a renowned French and American school, offering an authentic, immersive bilingual and decidedly 21st-Century educational experience for students from around the world. Our families join us from France and the United States to Rwanda, yes, but also from Spain and Italy, from Morocco, Congo, Lebanon, Haiti, Brazil, and Peru, from China, Japan, Korea, and India—over 68 nationalities in all. As you will discover, Charles Bégué Education Network is rigorous and creative; classical and innovative, preparing students for university, and life.

## LEVELS

### Nursery School

Nursery school plays an important role for students in their early childhood education. Without preschool, students are not always fully prepared for kindergarten and the subsequent grades. Enrolling your student in Nursery allows them access to early success that will continue in the later grades by promoting positive and effective learning and development for your child. Charles Bégué Education Network Nursery program is designed as an active and academic classroom where students will be engaged in learning, developing and discovering through play.

### Primary School

The Primary School equips students in learning how to think, how to treat others and work together as a team, and who God is as shown through the Bible. Our program includes a strong foundation in literacy and math, exploration of our world through social studies and science, learning about Jesus through the Bible and chapel times, and experiences in music, art, physical education, French, Kinyarwanda, library and technology. The atmosphere is nurturing and designed to setup all students for success. We have a trained and passionate group of educators who truly love learning and investing in each student's potential.

## Middle School

Our Middle School provides students with many opportunities to develop their academic skills, acquire knowledge and understanding, begin crafting their worldview, and explore special talents and interests. At the Middle School, from our core classes to electives to sports and activities, we are proud of being able to offer students an excellent, diverse, and challenging program that is learning centered and engages students right where they are. Our teachers are dedicated professionals focused on providing every student with a rigorous experience both academically and missionally based on Charles Bégué Education Network vision and current instructional practice

## High School

Our academic program offers a full American-style education in all areas of study with a global, missional perspective. This includes Advanced Placement courses and Pre-Advanced Placement courses, thus positioning students for admission to the world's finest colleges and universities. Our range of curricular offerings provide a challenging, stimulating learning environment for students at all levels of academic, personal, and spiritual development, including those for whom English is an additional language.
